He told us that to succeed in life we should always take help of others and even help others to achieve their goal. He shared two theories about how to live life: one was relating to the wheel. He told us that the invention of wheel was one of the greatest as it teaches us to move forward in life with the help of others and the second theory was about the rock that breaks from the mountain and falls in the Gangotri river. The journey of some rock ends very soon whereas some rock floats far away in the end they are worshiped by people in the name of God. So from the theory we learnt that one should not give up in their life at any moment and should perform each and every task with more energy and enthusiasm."

MOST CREDIBLE & HIGHEST QUALITY CERTIFICATION OF TEACHING & LEARNING OUTCOMES

NDIM's PGDM Programme Accorded Prestigious NBA Accreditation for the Highest Term of 6-Years

The PGDM Programme of New Delhi Institute of Management (NDIM), which is declared equivalent to an MBA by the AICTE and the Association of Indian Universities, has achieved a remarkable milestone. On December 23, 2024, it has been accredited by the National Board of Accreditation (NBA), Government of India, for the maximum permissible term of six years.

This unprecedented recognition underscores the industry-led and tech-driven quality of teaching and learning and placement outcomes at NDIM. Notably, NDIM is now among a select group of only six business schools in India to have received six years of accreditation from the NBA. This renewal of our accreditation for the maximum duration reaffirms the excellence and credibility of our PGDM programme.

Mentorship is a cornerstone of the teaching and learning experience at NDIM. We take immense pride in sharing this tremendous achievement with our valued Mentors, whose unwavering support and association have been instrumental in reaching this historic milestone. This recognition is as much yours as it is ours, and we look forward to continuing this journey of excellence together.

“Steve, thank you for being a mentor and a friend. Thanks for showing that what you build can change the world. I will miss you.” - Mark Zukerberg
